

Step Drill

Details & Dimensions

- Market Leading 5mm thick drilling capacity
- Fast, smooth drilling with minimal kickback.
- Specially hardened for impact wrench use.
- Precision ground flutes with easy chip clearance
- 135° split point angle for easy starting & accuracy.
- GoldMax low-friction titanium coating to stop burn out.
- High strength, non-slip shank design.

The first step drill optimised for use with impact wrenches & impact drivers; create holes in seconds.

Spiral flute design with self-starting drill tip, for fast, smooth drilling with a rotary drill or impact wrench. Market leading 5mm thick drilling capacity. VersaDrive™ Step Drills have a reinforced hex shank with increased strength for greater feed rates. The non-slip shank design provides a secure hold with all standard drill chucks, preventing slippage.

Recommended Applications

RECOMMENDED FOR USE WITH ROTARY DRILLS

RECOMMENDED FOR USE WITH IMPACT WRENCHES

RECOMMENDED FOR USE WITH IMPACT DRIVERS

USE WITH EXTENSION & SDS ARBORS

USE WITH VERSADRIVE ACCESSORIES

USE WITH ANY STANDARD DRILL CHUCK
